Comments from class members at the end of the day included –

From today's session, what was the most valuable "take away"?

- I think that my most valuable takeaway today was Sheriff Ivey telling us to "lead by standing around." I thought that was very impactful.
- Overall this was a very insightful session. I realize just how dedicated and concerned our law enforcement officials are to keep our residents safe.
- Very positive image of Sheriff and BCSO. Importance of community support to protect the community. BCSO really cares about the community.
- It is our responsibility to do whatever we can to help prevent or rather promote change in perception of past offenders. It is to our benefit to try to help rehabilitate or bring people out into a positive place in society.
- The relationship between mental health, drug abuse, and crime. Leadership by standing around. Tied Together, awesome. "Know the way" specific goals make a good leader.
- Learning from today's speakers there is a fabric/system in place which shows compassion and truly cares to reduce crime/ jail population. They also have a path and we as leaders have opportunities to assist and lift our fellow Brevardians.
- Today's session brought attention to how important it is to the community to address and help the incarcerated or at risk communities in order to help reduce recidivism and crime rate.
- The compassion of the police officers for the inmates. The compassion of Pastor Jarvis and Glen Outlaw for what they do.
- Community policing through social media. The importance of partnerships/friendships/relationships in keeping our community safe.
- The complexity of running the jail.

The So-Social networking and debriefing time was at Ryan's Pizza in Cocoa Village; the Bailout & Benefit theme raised \$1,000 + in contributions toward a scholarship for Leadership Brevard next year.
